Math Curriculum Makeover 9-12

with Dan Meyer

**3 webinars in series*

Wednesday, April 13, 2011

4:30 pm to 6:00 pm Mountain Time Zone

Please log on at 4:00 pm to do your mic & speaker test!

\$20 each

WHO SHOULD ATTEND:

Grade 9-12 Math teachers

ABOUT THE SESSION:

Our students like to solve problems they have already seen. They like seeing steps laid out in the text of a problem. They are impatient with new problems. To what extent does our adopted math curriculum encourage this impatience? How can we improve it? We will define the tools and skills of the modern curriculum designer, someone who can convert any interesting thing into a challenge for his or her students. We will emphasize the multimedia and modern technology essential to that role.

ABOUT THE FACILITATOR:

Dan Meyer taught high school math for six years and is currently studying on a doctoral fellowship at Stanford in curriculum design and teacher education. He received his Masters of Arts from the University of California at Davis in 2005 and Cable in the Classroom's Leader in Learning Award in 2008 for his work with math instruction, multimedia, and inquiry-based learning. In 2010 he was named a Future EdTech Leader by Tech & Learning magazine. He lives with his wife in the San Francisco Bay Area.
